

## Department of the Interior Recovery Investments *Investing in America's Economic Recovery*

### BLM Arizona Restoration Design Energy Project

#### Need

The Bureau of Land Management's (BLM) Restoration Design Energy Project will support President Obama and Secretary Salazar's goals to build America's new energy future and to protect and restore treasured landscapes. Implementation of this project will result in the identification of disturbed or previously developed sites within the National System of Public Lands throughout the State of Arizona, which, after remediation or site preparation, will be made available for renewable energy development. This will be accomplished through a collaborative public process to evaluate proposed sites for restoration or remediation and the suitability for development of renewable energy.

#### Recovery Act Funding

A contract for the scoping portion of this ARRA project was competitively awarded to ICF Incorporated, LLC for \$73,618. Information on the remaining contract actions will be provided upon contract award.

#### Benefits

BLM-Arizona will identify, restore or remediate a variety of sites statewide, and prepare these lands for future use as renewable energy developments. The project will result in the remediation and restoration of damaged or disturbed lands and the production of renewable energy. It will be accomplished in a manner that provides economic opportunities for business and community development.

#### More Information

For site submittal forms, see <http://www.blm.gov/az/st/en.html>
